

PAPER PEEPSHOW SPOOKY VIEWER

(PRINTER VERSION)

1 Print all the pieces.

2 Cut out all pieces using scissors.

3 Use a paper glue stick to evenly coat the backs of the side pieces with glue.

4 Glue the side pieces together so that the black sides face **out**.

5 Fold the sides carefully and evenly along the dotted lines—be sure that the ends on the dotted side point **up**.

6 Cut two 2½ inch squares from an empty cereal or cracker box.

7 Glue the insides of the folded edges to the two box squares using white glue.

8 Cut out the inside areas of the interior pieces.

9 Using pencil crayons or crayons, color in the sky area and trees.

10 Trace and color in the tree and moon panels onto wax paper, tissue paper, tracing paper or vellum. If using wax paper, use permanent markers. If using tissue paper, vellum, or tracing paper, use any markers.

11 Sandwich the traced trees and sky/moon panels into their corresponding paper frames, using white glue to hold shut.

12 Color in the paper labeled **IB** with crayons, pencil crayons and markers with night sky colors.

13 Using a generous layer of glue from the paper glue stick, glue the pieces labeled **F**, **IB**, and **B** as shown in the diagram

14 Punch holes using a ¼ inch paper punch in the front and back of the pieces of the paper peepshow where indicated.

Tip: Test to see how flat and square each layer is by folding the peepshow down and lining it up with the square back of the peepshow, before the glue dries.

15 Using white glue, glue each of the layers into the paper peepshow, covering the corresponding number. Cut the numbered tabs off as they are added.

16 Paper clips keep each of the layers in place while the glue dries on each.

OPTIONAL: A string to keep the peepshow compact when not in use.

17 Lay the center of a 24 inch piece of cord or string across the back of the peepshow. Use white glue to adhere the piece labeled **C** to the back, covering the string. Use your fingers like a squeegee to snug fit the paper.

18 Trim the excess paper from the edges of the piece once the glue has dried.

19 Using a ¼ inch paper hole punch, line up the punch with the existing hole on the inside and punch the hole clear again.

20 Pinch each accordion fold down to collapse the peepshow. Wrap the string around twice and tie in a loose knot at the front.

Now that you have made a spooky forest, what other viewers can you design? A cave? A concert? Use your imagination!

MATERIALS

White glue

Paper clips

Glue stick

¼ inch hole punch

Scissors

Crayons / Pencil crayons

Cereal box

Ruler

Wax paper & permanent markers OR

Tracing paper, tissue paper, vellum & any markers

A piece of string or cord, 24 inches long
